

I would like to comment on the possibility of new legislation that could change or lessen the impact of the Indiana Telephone Privacy Law. The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.

Indiana's Telephone Privacy law has improved my families time at home significantly. I rarely get any telephone solicitation since the Indiana law was passed. Prior to the Indiana Telephone Privacy law we would receive several calls per day. Many times these calls would come during the short time our family has together each day.

There are few things that government has done that has had such a direct impact on our lives. I am strongly against any change in the law that would affect the current Indiana Telephone Privacy law.
